

CYBER JAGROOKTA DIVAS

MARCH 2024

Protect yourself from cyber attacks

Turn on Multifactor Authentication

Implement [multifactor authentication](#) on your accounts and make it significantly less likely you'll get hacked

Update Your Software

Update your software. In fact, turn on automatic updates.

Think Before You Click

Think before you click. More than 90% of successful cyber-attacks start with a phishing email.

Use Strong Passwords

Use strong passwords, and ideally a password manager to generate and store unique passwords.

Protecting yourself from cybercrime in India requires proactive measures and vigilance. Keep your systems updated with security patches, use reliable internet security software, and practice safe online habits such as avoiding suspicious links and safeguarding personal information.
